## ADH Wazimap Covid-19 Data Subsets

This data set is a collection of 17 files which are snapshot subsets of the complete COVID-19 dataset maintained by Our World in Data. These subsets are visualised on the [Africa Data Hub Wazimap Platform](#)

The snapshot was taken on 2 February 2021 - however, the full [COVID-19 dataset](#) is updated daily by the maintainers on the OWID website.

This dataset is for Countries around the world and includes data on confirmed cases, deaths, hospitalisations, and testing, as well as other variables of potential interest. A full description of each of the data columns can be found on the [OWID Codebook](#)
